

AROA PREMIUM

Adjustable Temperature Cordless Electric Kettle

This quick heat up electric brew kettle comes with many practical features that provide convenience and safety in use. The unique adjustable electronic temperature (from 120° to 210° degrees Fahrenheit) control provides proper brewing of various teas and coffee and can continuously hold selected temperature for hours. You control the ideal temperature of your water. Equipped with a large 58-Ounce (1.7-L) capacity BPA-free borosilicate glass. Digital display and push buttons make using the electric kettle functions simple. Convenience features such as comfortable handle and push button lid opener make using the kettle easy and safe. Cordless operation thanks to the removable swivel base + brushed metal ring with indicator light provides for beautiful design and easy use of the kettle. Tasteful cobalt blue lighting brightens your experience.
